

## KNCF/ BIRDLIFE INTERNATIONAL TOKYO

- BirdLife International is a global partnership of conservation organisations (NGOs) that strives to conserve birds, their habitats and global biodiversity, working with people towards sustainability in the use of natural resources. There are over 100 BirdLife Partners worldwide – one per country or territory – and growing.
- BirdLife International Tokyo (hereinafter BirdLife Tokyo) was founded in April 2002 and since then, they have advanced conservation projects for birds and all nature.
- KCNC was established in 1992, in the same year as United Nations Conference on Environment and Development at Rio de Janeiro was held.
- Since its establishment, 32 million US dollars have been granted to approximately 1,000 projects through KNCF (Keidanren Nature Conservation Fund). KNCF/KCNC supports a wide range of projects mainly on biodiversity conservation including natural resources management and rare species conservation and others such as plantation or environmental education.

# ZOO

# BERLIN

Located in the center of the capital of Germany, the famous Zoo Berlin attracts millions of people every year. Guests from all over the world dive into the fascinating world of animals and get the chance to learn more about how to protect endangered species. The Zoo Berlin is dedicated to species conservation: In addition to international partner projects with a focus on research, education and habitat protection, local projects and promising resettlements around the world have been supported for many years. With a combination between tradition and modernity – the more than 175 year old Zoo Berlin is one of a kind.

The World Pheasant Association (WPA) was founded in 1975 by a group of aviculturists and sporting enthusiasts who wanted to do more for the birds than just keep them.

WPA' mission is to commit to the conservation of Galliformes and the habitats they depend on.

#### **What we do:**

- Provide global leadership in the conservation of Galliformes and their habitats, defining priorities that will maximize benefits to overall biodiversity and ecosystem conservation.
- Help members and zoos ensure that collections of Galliformes are maintained to the highest conservation and welfare standards.
- Train ecologists in the countries where Galliformes occur, developing the skills necessary for effective conservation so that issues can be tackled locally.
- Support urgently needed direct conservation action based on sound science.
- Co-ordinate an extensive network of over 350 specialist researchers in 60 countries.

## Wildlife Reserves Singapore Group

- Wildlife Reserves Singapore (WRS) is dedicated to the management of world-leading zoological institutions—Jurong Bird Park, Night Safari, River Safari and Singapore Zoo—that aim to inspire people to value and conserve biodiversity by providing meaningful and memorable wildlife experiences.

A self-funded organisation, WRS focuses on protecting biodiversity in Singapore and Southeast Asia through collaborations with like-minded partners, organisations and institutions. Each year, the four attractions welcome 4.6 million visitors.

- Vision: To be a world-leading zoological institution that inspires people to value and conserve biodiversity.
- Mission: We provide meaningful and memorable wildlife experiences with a focus on protecting biodiversity in Singapore and the region.
